If the company has more than 5 affiliates:

The statistic is an annual inventory of Danish foreign affiliates that are owned or controlled by a Danish parent company. The location (country), industry, employment, staffing costs, net turnover, and additions to tangible non-current assets of foreign affiliates are reported

As Statistics Denmark has knowledge of six or more foreign affiliates of the company, it is only possible to report via a pre-filled Excel spreadsheet which can be downloaded <u>here</u>. This solution has been created to reduce the respondent burden.

-To proceed, you must download an Excel sheet via this link

-The sheet contains prefilled information about the affiliates of which we have knowledge.

-Save the sheet on your PC.

-Fill out the sheet for all companies - including new affiliates.

-Finish the report by uploading the filled out sheet here ►
