

9. Main classifications used

9.0 Classifications used for the production approach

Table 9.1 shows the link between the national accounts' grouping by industry and the NACE Rev. 2. There are five levels for publication of the final national accounts, covering 117, 69, 36a2, 19a2 and 10 industries respectively.

Table 9.1 includes references to Statistics Denmark's standard grouping at 127-industry level – a level of aggregation not used in the national accounts. The connection between the 127 standard grouping and the most detailed six-digit DK-NACE industries is documented in the publication "*Dansk Branchekode 2007*" published by Statistics Denmark, annexes 1 and 2 of which include the aggregation key.

There are two reasons why the national accounts cannot use the 127 standard grouping as their most detailed level of publication. Firstly, it does not match the functional breakdown of construction activity in the national accounts, and secondly, within some of the 127 groups, the national accounts need to separate market activity and output for own use from (other) non-market activity.

9.1 Classifications used for the income approach

Classifications used for GDP compiled by the income approach are the same as classifications used for GDP compiled by the production approach.

Compensation of employees, other taxes on production and imports and other subsidies on production, are all compiled at the national accounts 117 industry level, cf. section 9.1. Therefore, gross operating surplus and mixed income are also compiled at this level.

Consumption of fixed capital is compiled at the national accounts 69 industry level, cf. section 9.1, as this is the most detailed breakdown of gross fixed capital formation.

9.2 Classifications used for the expenditure approach

The most important classifications used for GDP compiled by the expenditure approach are:

- Household final consumption expenditure (72 groups) according to COICOP (table 9.2)
- Gross Fixed Capital Formation by type of asset (table 9.3) (13 asset types)
- Government final consumption expenditure according to COFOG (10 groups) (table 9.4)

Tables 9.5 and 9.6 show the relationships between the national accounts consumption grouping and COICOP 2 and COICOP.
