

Chapter 10. Main classifications used

10.1 Classifications by industry

Table 140 shows the link between the national accounts' grouping by industry and the NACE Rev. 1. There are four levels for publication of the final national accounts, covering 130, 53, 27 and 9 industries respectively.

Table 140 includes references to Danmarks Statistik's standard grouping at 111-industry level – a level of aggregation not used in the national accounts. The connection between the 111 standard grouping and the most detailed six-digit DK-NACE industries is documented in the publication "*Dansk Branchekode 1993, 2 udgave 1996*" published by Danmarks Statistik, annexes 1 and 2 of which include the aggregation key.

There are two reasons why the national accounts cannot use the 111 standard grouping as their most detailed level of publication. Firstly, it does not match the functional breakdown of construction in the national accounts, and secondly, within some of the 111 groups, the national accounts need to separate market activity and output for own use from (other) non-market activity.
